

Assistant Portfolio Manager (M/F)

6 months internship

MedinCell is owned and operated by our talented employees who have come together from around the world to achieve our mission of Better Medicine for All. Through purposeful innovation, we aim to improve the treatments available to patients. And we believe that everyone should have access to best-in-class medication, so we focus on making our products available regardless of local economic conditions. To ensure access, we work on both for-profit and non-profit projects, in collaboration with highly valued partners ranging from big pharmas to physicians, from biotech firms to academics and foundations. Most importantly, our partners share our values based on trust and transparency.

Portfolio Management works at the very core of this mission by managing the selection and evaluation of new pipeline opportunities in line with the company's strategic objective. At MedinCell, we have a cross functional approach to identifying how our technology, BEPO, can address the needs of all stakeholders, from patients to clinicians to payers, to ensure the best outcomes for patients worldwide.

We are seeking an Intern in our Montpellier (Jacou) facility to participate in our ongoing success as a profitable, fast-growing, socially responsible company dedicated to Global Health.

Main responsibilities:

- Assisting the Portfolio Manager in screening and identifying new product development opportunities in a wide range of therapeutic areas for MedinCell:
 - Critical review of literature to understand current data on critical topics: Efficacy, side effects.
 - Support the Business Development team and recommend potential opportunities to pursue
 - Participate in operational meetings to propose, defend and prioritize new opportunities
 - Preparation and centralization of internal templates for evaluation of new opportunities

- Assisting the Portfolio Manager in establishing portfolio pipeline communication tools:
 - Creation of scoring matrices and support documents for portfolio pipeline which will be used for decisive internal presentations to MDC's teams, as well as external communication to potential partners.

Education and experience:

- Pharmacy and/or life sciences background combined with business school training

Skills:

- Fluency in English
- Prior experience in literature analysis and scientific documentation reading in English
- Complete proficiency in Microsoft Office (PowerPoint, Word, Excel)

Work attitude

- Autonomous
- Curious
- Desire to continuously improve and progress
- Eagerness to perform lab work
- Strong desire to solve technical problems
- Ability to manage time and meet deadlines
- Openness and ability to adapt to changing situations
- Strong work ethic

Please note that this is a 6-months internship minimum, the topic investigated by the intern requiring this minimum period.

Application have to be registered on our website:
